InteleViewer for MacOS

1. Download InteleViewer from this link:

San Radiology & Nuclear Medicine: IntelePACS: InteleViewer Tracks

2. Click on Stable Track Mac OS X Installer

3. Download the Installer and install the appt

4. After the installation, this window will pop up. Drag InteleViewer to the applications folder

5. Launch InteleViewer from the Applications folder

6. You will get the below security prompt – click CANCEL:

7. You will then need to go to System Preferences > Security & Privacy

8. Click on OPEN ANYWAY for InteleViewer

Security & Privacy	Q Search					
General FileVault Firewall Privacy A login password has been set for this user Change Password Require password immediately after sleep or screen saver begins Show a message when the screen is locked Set Lock Message Disable automatic login						
Allow apps downloaded from: App Store App Store and identified developers						
"InteleViewer" was blocked from use because it is not from an identified developer.	Open Anyway					
Click the lock to make changes.	Advanced ?					

9. Navigate back to Applications and open InteleViewer

10. If you have not had InteleViewer on this computer before you will need to add the bookmark for San Radiology, click on **EDIT BOOKMARKS**
